U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05)

DETAILED ACTION

Claims 6-7 are canceled.

Response to Amendment

Applicants have added new the claims 12-18. However, due to the light of the interview on 3/22/2006, Mr. Berkhimer and Mr. Tanner argued that there is a measure device (to weight the liquid) in the droplet discharge apparatus of the instant invention. Therefore, the following restriction is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-5 and 12-17, drawn to a liquid crystal display device manufacture method, classified in class 249, subclass 189.
- II. Claims 8-11 and 18, drawn to a liquid crystal display device manufacturing apparatus, classified in class 347, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, a liquid crystal display device manufacturing method (invention

Application/Control Number: 10/626,565

Art Unit: 2871

I) can be practiced with the different measuring device, which can be (a) droplet controller device to control the amount of droplets, (b) micro weighting device to control the weight. The device (b) is this invention used according to Mr. Berkhimer and Mr. Tanner at interview on 3/22/2006.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed invetion for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims is generic.

Application/Control Number: 10/626,565

Art Unit: 2871

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571)

272-2296. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-

4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
